

Level 3-----

	Filename	Line
1. C++ References	unizork.cpp	28
2. Pointers	unizork.h	89
3. Inheritance	character.h	5
4. Destructors	unizork.cpp	286
5. Memory management	unizork.cpp	36, 286
6. Header files (inclusion guards)	*.h files	0
7. Arrays and pointers	ramblelist.h	11
8. Friendship	event.h	14,15
9. Basic preprocessor directives	ramblelist.cpp	6
10. Global variables	unizork.cpp	25
11. Private, Public, Protected	person.h	9

Level 2-----

1. Definition of template functions	unizork.h	26
2. Operator overloading	times.cpp	95
3. Abstract classes	nameable.h	ageable.h
4. Copy constructors (deep , shallow copy)	ramble.cpp	6, shallow at ramblist.cpp 58
5. Bit structures	time.h	28,29
6. Advanced pre-processor directives	unizork.cpp	21
7. C++ Object Construction Sequence	character.h	7
8._INITIALIZER List	event.cpp	5

Level 1-----

1. Virtual functions	nameable.h	7
2. Definition of template classes	unizork.h	41
3. Multiple inheritance	person.h	8
4. namespaces	times.cpp	7
5. Programmer defined exceptions	unizork.cpp	210
6. Unions	unizork.cpp	42
7. dynamic_cast	unizork.cpp	54
